West Gulf Division Vice Director to Address NARS

Our illustrious President has finagled a deal with an old Oklahoma friend for the May meeting program. H. O. has advised that Vice Director Coy Day, N5OK, will be here to talk with NARS members about an intriguing topic -- "The ARRL and the Future of Amateur Radio." Coy says that a change in the policy by the ARRL Board of Directors will change amateur radio in a big way. I am sure that all will be interested in hearing about this topic, so come on out.

-- K8CSG

Novice/Tech'99 Off and Running!

The 1999 session of the NARS Novice/Tech class hit the ground running the evening of April 7th with an enrollment of twenty-one folks eager to take that first step into the wonderful world of amateur radio. Several individuals had a Tech license and were there to bone up on the code portion of the course. I was pleased to see a significant number of women going for their tickets. Many of the instructors were present to awe the masses with their tales of struggles and accomplishments, and I must say that this crowd didn't buy half of it!

The first five evenings were devoted entirely to Morse code and were under the direction of the wily George, K5VUU, with backup by O.J., K1OJ, and Uncle Zed, K5ZTY. Apparently these guys know their business based upon the growing ability of the students to absorb the training.

Now, we're in the theory portion of this course. The enrollment has slimmed down to twelve determined souls, and the gut feeling here is that this group is going all the way. The final FCC exam will be held on June 2nd. Don't be surprised to see a few new faces at Field Day this year. By June 26th, they'll be ready to hit the trenches!

Joe Sokolowski, KD5KR

NARS PICNIC

For those looking for the normal spring picnic date, please reset your calendars and look for this year's picnic in the Fall. It seems we have a surplus of spring activities such as TXQP, Novice Class, Field Day, and Service Events. We hope that a Fall picnic will give us a pleasant activity in this cooler and less busy period. Date and location will be announced shortly.

-- Jack, WA8GHZ

Important Dates

Friday, May 21, 7:30-9:30 PM

NARS General Membership Meeting at
Spring Cypress Presbyterian Church, 6000
Spring Cypress Road

Saturday, May 22, 8:30 AM

License Exam Session. Tomball Commu-
nity Center, S. Cherry & Market streets (just
South of Main.)

Tuesday, May 25, 7:30 PM

NARS Board of Directors meeting, H.O.
Townsend's home, 16880 E. Maglitto Circle

Wed. & Thur. Evenings, 7:00-9:00 PM

NARS Novice and Technician Classes
Prince of Peace Catholic Community
Tomball Pkwy. just South of Cypresswood

Contests:

May 21-23: Major Six Club Contest

May 22-23: Texas QSO Party
Baltic Contest

May 29-30: CQ WW WPX CW Contest
ARCI QRP Hoot Owl Sprint, CW
Memorial Day CW Sprint

June 12: Portugal Day Contest

June 12-13: ANARTS WWRTTY Contest

June 19-20: All Asian CW DX Contest

June 26-27: ARRL Field Day

July 1: RAC Canada Day Contest

Deadline for articles to appear in June issue
- Saturday, May 29

BREAKFAST

at Victors

**Saturdays
8:00 AM**

President's Corner May 1999

Howdy all...

May brings a busy month for our club -- Texas QSO Party and planning for June's ARRL national Field Day exercise. Walter - KK5LO and George - K5VUU are leading the charge. Have you been contacted to join in or help out with any of the preparation? If not, pickup that phone and call in your pledge.

Last month I mentioned that participation was a keyword in the life of our club. And, it is. A club like NARS doesn't run itself. It needs you pitchin' in to sustain itself and maintain a healthy infrastructure to keep the ball rolling. NARS isn't a 2-meter repeater club, or a Monday night, or lid net club. Thank goodness. It's a great group of amateur radio operators who believe in a commitment to public service and furthering the state of the art of amateur radio through the use of current technologies and who, on occasion, advance the state of the art.

The variety of interests in NARS is the envy of many a ham club. But as good as this fact is by itself, it is not enough to sustain itself and ensure long term growth without your participation.

When I joined NARS a few years ago, I couldn't wait to be checked in to the Wednesday night net. It was the only way I could join in the fun on the air while living in an apartment. The net started right on time and had a large rotating series of net control Ops. Yep, we had a trivia question and someone to jump in and read an ARRL bulletin here and there. What's the health of the net now? Well, ... let's put it this way, it needs our participation. OK, maybe we need to look at the objectives of the net; maybe they have changed a little. We can adjust. The real point is that the Wednesday night net is not the only place the club needs our participation.

The club needs an on-going program and net control committee. Other committees may include Public Service, contests, DX, QRP etc. The same members cannot keep taking on more and more tasks without getting worn out at some point. Gettin' more members involved is a first-line strategy at heading this off and ensuring sustained growth while maintaining a top quality club. Ask yourself "why belong to a club" like NARS. See if it's not worth your participation. When you see a need, contact one of the board members.

I'm proud to tell you that Coy Day - N5OK - will be speaking at our May meeting. As you know Coy is our ARRL Vice Director for the West Gulf Division. See you at the meeting.

73 de H. O. - WA5MLT

The annual HamCom in Arlington (Dallas) will be held on Friday, Saturday, and Sunday, June the 11, 12, and 13th this year. The schedule is as follows: Commercial Vendors open Friday 1PM til 5PM, Saturday 9AM til 5PM, Sunday closed. Commercial Flea Market Vendors (inside) Friday, 1PM til 9PM, Saturday 9AM til 5PM, Sunday 9AM til 2PM, and Outside Flea Market Vendors, Friday 1PM til 9PM, Saturday, 7AM til 5PM Sunday, 9AM til PM.

There are lots of QRP doings Saturday June 12th. The NorTex QRP group is sponsoring several events for QRP enthusiasts this year. There will be forums on Saturday from 9:00 AM until 12:30 PM with the following speakers scheduled: George Dobbs, G3RJV, from the GQRP club of Great Britain speaking on home brewing techniques, Doug Hendricks, KI6DS, one of the founders of NorCal talking on the NorCal projects and how they are developed, Chuck Adams, K5FO, founder of the QRP-L and the Fox Hunt will probably run his CW copying contest again, and Paul Hardin, NA5N, a receiver technician from the VLA observatory at Socorro NM talking on the sun activity and how it affects propagation. After the QRP talks the ARRL is going to use the room to give their talk on FCC Enforcement. This one might be interesting too.

There will be a large QRP booth run by the NorTex QRP club, the QRP-ARCI, the G-QRP club and NorCal QRP club. This booth will be manned all day Saturday and will be displaying kits, club info, periodicals and projects by some of those in attendance and will serve as a place to sit and rest for a few minutes and ragchew.

So far the unofficial registration list has QRPers coming from California, Michigan, England, Colorado, Oklahoma, Arkansas, Louisiana, New Mexico, Arizona, Mississippi, Missouri and Kansas. It'll be a good time to meet face to face some of the guys that you have met on the air.

After the convention center closes at 5PM there will almost certainly be an unofficial get-together to eat somewhere in the area.

Saturday night there will be a NorCal sponsored open house at the Courtyard Marriott Hotel right next to the Arlington Convention center. It will start at 7:00 PM and go until about midnight. There will be vendors displaying their wares, displays of home built projects, working rigs, and the Regenerative Receiver Building Contest judging. There will be door prizes and contest prizes galore. Here is the HamCom prize list at the time of this writing: NorCal 20 transceiver kit, Anodized case for a NorCal 20, Small Wonder Labs digital transceiver kit, a Red Hot Radio 20 or 40 meter transceiver kit, a W6MMA SLV 40 meter antenna kit, 3 "Handbook For QRPers and Homebrewers" books, 2 New Jersey Fireball transmitter kits, 3 bound volumes of 1998 QRP magazine, 3 NorCal log books, 3 "Elmer 101" issues of QRP, 1 NorCal tee shirt, 1 NorCal Zombie tee shirt, 1 NorCal resistor kit, and 1 NorCal capacitor kit. There may be more by June 12th.

The NorCal 20 transceiver kit will be a pre-registration prize. If you would like to preregister for the QRP events, send Doug Hendricks an email at ki6ds@dpol.k12.ca.us with HamCom in the subject line and your name and call sign in the message stating that you would like to register. There will be a laminated name badge waiting for you at the NorTex booth at HamCom and you will be eligible to win the NorCal 20. You must be present to win.

There are no fees for any of these events and no fee to preregister, other than admission to HamCom, and all are welcome to participate or just come around and look. If you want more information about the QRP activities at HamCom and you do web pages, you can find everything that you ever wanted to know on the NorCal web page at <http://www.fix.net/norcal.html>.

I hope to see you all there.

72, Unca'Zed

CQ DX de PP/KC5BXR

The trip was not to operate from a DX country, but one of our NARS members recently returned from an urban expedition to PP land - Brazil.

Sylvia Reimer, KC5BXR, a Registered Nurse in the emergency department at Hermann Hospital, joined 30 other nurses, physicians, dentists, pharmacists, and other health care professionals, mostly from Tennessee, for a medical mission to Brazil. For the first time, the Brazilian government permitted these types of medical teams into their country. This was the first of 30 planned trips over the next few years to provide basic medical care to the residents of the famous slums of Rio de Janeiro; a partnership between the Tennessee Baptist Convention and the Baptist Church of Brazil.

Sylvia met five team members in Miami before their 4,000 mile and eight hour flight to Sao Paulo, where they cleared customs and changed planes. Other team members had traveled through Atlanta. In addition to clothes, most carried a second suitcase of sample medications donated by pharmaceutical companies, or other supplies and equipment. They all met in Rio on Friday January 8th and began mandatory social calls, even before they unpacked. The teams toured a medical school, a nursing school, and several church operated orphanages and elder care homes in the area. The medical and nursing school directors were critical in getting Brazilian government approval for the teams.

The true population of the Rio slums is uncounted, but just one of the over 550 is reported to be home to about 350,000 people, mostly women and children. The Brazil church leaders made deals with the drug dealers to use their cantinas during the day for some of their clinics. One party extended well into the night and the team was unable to arouse the owners the following day to gain access. Instead, the clinic was held on the street. Another clinic was held in an

un-air conditioned building at the bottom of the hill where many slums are located. Over 1,600 patients were seen and treated during the four days the clinics were open. There was not time for the dentists to do more than pull teeth during their visit. An elderly woman, who was carried down the hill to the clinic in a chair, was found murdered the following day. Nearly all the children had skin infections of one type or another, most had head lice and many also had intestinal worms. This is much as would be expected from living in dirt floor one room shacks without running water or electricity, and with open sewage in the streets. Knowledge of prevention was as lacking as the medical care. Each patient had to be taught to wash their hands before eating, and to wash the abundant raw fruit before eating it. The greatest expressed joy seemed to be from those fitted with eye glasses; suddenly they could see clearly for the first time.

It was summer South of the equator, and most schools were out for several months. Volunteer translators, mainly the children of American missionaries in Brazil, helped each team with the Portuguese language.

There was a little time for sight seeing, and Sylvia can say she has walked on Impanema Beach and along Copacabana Boulevard. A brief side trip on the way to the airport took them to see the large statue of Christ and Sugar Loaf Mountain.

Morse code is said to be the universal language. As Sylvia and the others learned, the loving touch of another human can also bridge language and cultural barriers.

-- Jerry Reimer, KK5CA

Make Your Hair Dryer a Heat Gun

Have you ever had a barber use a hair dryer to shape and comb your hair? That reminded me of a novel use of a hair dryer as put forth by Veilo S. Buccione, W9XL, of Portage, Indiana. He needed to apply heat shrink tubing on some coil connections. The components were too closely spaced to allow use of a match. He asked himself: "How could I shrink the tubing quickly, without using a flame?" A friend told him that a pistol-type hair dryer would do the job. He soon found a 1250-watt hair-dryer and tried to shrink the tubing with it. Unfortunately, it did not work quickly and did not shrink the tubing to a tight fit.

He wondered if the dryer would work better if the heat was concentrated. A funnel made of some metal shim stock did the trick. The large end of the funnel fits over the end of the hair-dryer nozzle and is taped in place. The funnel tapers to a 1/4-inch opening over a length of about six inches. Concentrated hot air from the funnel produces a nice, tight heat-shrink fit in a few seconds.

The thought occurred that some members who construct projects and want to use heat-shrink tubing would find W9XL's idea useful, safe and effective.

-- Harry Gage, N5WIZ

April 24 VE Session

The NARS/Compaq group held its regular examination session on April 24 in Tomball. Six candidates participated, submitting to examination on twelve individual elements. Of these, seven were passed and five failed. Matt Flickinger, KC5NXQ became an Advanced Class licensee and Robert Timmons became a Technician Class licensee. One member of the current NARS class passed element 2 and received a CSCE.

Participating VEs included K8CSG, K5ZTY, KJ5X and WC5CW representing NARS, and K5WH representing Compaq. In addition, Compaq's Willie, KB5TES, assisted with the paperwork.

-- K8CSG

DX News

*Now learn, love, have do, be the best;
Each in DX excel the rest;
Strive; and hold fast this truth of
heaven,
To him that hath shall more be given.*

One of the local QRPers came up the hill to visit The Old Timer, complaining vociferously about the non-QSLing of a certain well-known DX-type. "What do I have to do to get a QSL from 3B8CF?" grouched the QRPer. "I've sent several cards via various routes but nothing has ever come back" Recalling his own long frustration with 3B8CF, The Old Timer thoughtfully considered his answer. "Are you sure you are doing it right?" he asked first. "At this the QRPer just about came unglued. "How many right ways are there?" he stormed. "I've sent all of them either airmail or via Les Bannon; that's what you said to do, isn't it?" "And you're sure you have sent something to pay the return postage?" asked The Old Timer. "My God, yes!" shouted the QRPer. "Do you think I just fell off the turnip truck?" The Old Timer quietly thought of his alternatives, and decided to 'fess up to the QRPer. "I'll tell you how I finally got a QSL from Jacky. After working him countless times over the last twenty-five years or so and sending several QSLs with results like yours, when I worked him the last time I took the bull by the horns and said to him: 'Jacky, you and I have talked many times over the last quarter century, and I have sent several QSLs which have all gone unanswered. What do I have to do to get one of your QSLs?'" Jacky answered with a chuckle. "Okay, okay. I'll send you one," he promised. And he did!

Propagation at the beginning of April was largely poor for most of each day. The numbers essentially reflected those conditions. However, some good DX could still be worked if one listened and tuned around a bit. For example, the 3B9R operation on Rodriguex came up as expected on April 1 and SØ9A in Western Sahara was quite workable. Most signals were generally rather poor, however. By Apr. 5 the SFI was up to 133, accompanied by an A index of 12 but the bands did not sound that good. Nonetheless, Monk Apollo (SV2ASP/A) showed up from Mt. Athos on 20 meters for an hour in the afternoon. Propagation through the middle of the month was fairly spotty, with several days having good SFIs but also rather high A/K indices. Despite these conditions, there was some good DX to be had.

LOCAL EVENTS: KJ5X and K8CSG worked 3B9R on Apr. 1. K5VUU and others followed shortly afterward. KD5AIJ worked XX9TRR on Macao. K8CSG received a card from XZ1N (Burma/Myanmar) at mid-month. Jack, WA8GHZ, worked 5N0GMV from his mobile on 14006 kHz. The eighth most wanted country in DXCC, Tromelin Island, came on the air for about two weeks near the end of April. Jacques is one of the fellows who maintain the weather station equipment and facilities on Tromelin, Glorioso, and Juan de Nova, collectively one of the most difficult groups of locations to work. Although he freelances from time to time, the best way to work Jacques is via his QSL manager, VE3NW, in

Quebec. With the aid of a few phone calls and other help, several NARS DXers worked him during this visit. KD5AIJ, K5ZTY, K5NZ, K5VUU, KM5LA, W5PDW, KJ5X, W5BA (last under the wire on the last day) and K8CSG all got good QSOs. Congratulations to KJ5X upon the announcement of his WAZ award. I guess K5NZ will be next.

The Rodriguez DXpedition came up right on schedule on April 1. I was running the Wed. PM 2-meter net when the first spot came up on the DX cluster. Shortly after the end of the net (like about 62.3 seconds) my phone rang. It was KJ5X telling me he had already worked 3B9R, which is probably why he was not in the net. He slyly asked if I had worked the DXpedition yet. I told him I did not need to work them, having confirmed Rodriguez in 1971. After a bit more jawing with Jim, I decided to take a listen and quickly found 3B9R on 10 MHz. The signal was so strong I decided to give it a try, despite not having a truly suitable antenna for that band. About five minutes after Jim's call to me I called him to report "I have them in my log." All with an 80/40-meter trap dipole which took about 60 watts from the TS940 on 30-meters. I recall Kirk saying something about that contact not counting because "it wasn't worked with a resonant antenna" or something like that! With various phone calls involved, most of the NARS DXers worked him, though with some difficulties in a few cases.

Another of our NARS members has earned his WAZ (Worked All Zones) award. John, W5PDW, dropped by recently to have his cards and application checked. All was in good order, the application was signed and sent on to CW Magazine. That makes three fellows who have completed the work for WAZ during the past twelve months, with several others getting close. Congratulations, John!

NORTH KOREA! Apparently, North Korea was on the air legitimately during April. Reports say that Martti Laine again demonstrated amateur radio to officials of the North Korean government on or about April 20. The demonstration lasted for about two hours during which stations in Japan and

Europe were worked. Reportedly there may have been one or two West Coast stations worked, too. Apparently there was no copy here in Texas. Expectations are that Martti may be working on a larger, more comprehensive operation of some sort. Have to wait and see, one supposes.

The DX cluster appears to have a problem or problems of some sort. Many locals can connect to the NARS digipeater with no difficulty, but attempts to connect to K5LV are very frequently met with rebuffs in the form of DISCONNECTED messages. Several fellows are using foreign clusters via the Internet to get their information regarding DX opportunities.

COMPARING CYCLE 22 WITH CYCLE 23: I am beginning to feel that Cycle 23 may not measure up as highly as some have forecast it to be. I recently pulled out my log from eleven years ago and compared it to my recent log. There appears to have been significantly more and better DX during that part of Cycle 22 than recent weeks in Cycle 23. I realize this may not be a highly scientific analysis, but it is not a bad way to get a quick feel for things. Eleven years ago, my log had many entries for FK8, TA3, 5B4, TY, J52, 7P8, BY, BV, DU, YB and various of the rarer entities which were once part of the USSR. Those same entities still appear in my log today, but they appear to be much less frequent. Also, I am seeing numerous lower signal reports than eleven years ago. Just a curious feeling.

Buffalo Bayou Regatta Recap

Many thanks to everyone who helped with the Buffalo Bayou Regatta this year. There were 165 canoeists who paddled their way from start to finish. It was a beautiful day, and fun was had by all.

-- Scott, N5KEU

WalkAmerica 1999

The March of Dimes WalkAmerica 1999 was held on April 25 at the George Bush Park (Cullen Barker Park). I would like to thank the following members:

KD5AYF - George, KC5UCI - Dewey
K8CSG - Bill, KB5UJS - Allan and
XYL, AC5EW - Vicki and Sarah,
N5WIZ - Harry and XYL

The walk had its bumps but this well seasoned group of NARS members knew how to handle it. I would especially like to thank Vicki and Sarah for working their water stop by pouring water for the walkers when the volunteers for the water stop never showed up. I know we all had fun doing this public service event and hope that you will consider coming out and supporting the March of Dimes WalkAmerica 2000.

Thanks for your support.

-- Paul, N5NXS

Board Meeting April 27, 1999

Treasurer's Report - Bank balance at the end of March was \$5166.70.

Interest Survey - All members are encouraged to respond to an interest survey that will be mailed to you. This information is greatly needed to help the Board develop better plans for meeting member needs and interests.

Picnic - New date chosen is October 9, 1999. Mark your calendar and plan to attend.

-- Bob.....KC5JZO - Secretary

NARS Condolence List

Best wishes to the XYL of Brian Derx, N5BA, who is recuperating from surgery.
Best wishes to Deral Kent, K5WNO, who is recovering from surgery.
Best wishes to Dick Rooney, W5VHN, who is recovering from an extended ailment.
Best wishes to Marian Denton, KC5SGV, who is recovering from a fall at home.
Best wished to Ann Rooney who is recovering from a recent blood count problem.
